The Who and Why...

Cloebelle is a young, exciting company born out of a desire to provide stunning, european designer-inspired jewelry at affordable prices. Our mission is to help you assert your individuality and show the world your imagination and flare.

Mark Healey founded Cloebelle out of a wish to please his daughter, who wanted to have a Pandora bracelet, fully loaded with beads and charms, like her friend at school. Subsequently, the company was formed and named after his daughters Chloe and Annabelle.

Cloebelle, originating in Europe, now has a presence in the U.S. market. The U.K. Corporate Office is located in the south of England, where poets from the past have been inspired, and the U.S. Headquarters is conveniently located in Tampa, Florida.

We are continually expanding our lines of handcrafted beads in glass and silver and strive to provide quality jewelry choices at affordable prices.

We welcome your comments.

Chains

Our sterling silver bracelets and necklaces are adorned with the Cloebelle butterfly charm.

Caring For Your Jewelry

All fine sterling silver does tarnish and sometimes the chemical makeup and oils of your skin will accelerate the tarnishing of Sterling Silver jewelry.

We recommend using a dry jewelry polishing cloth for a quick touch-up.

Storage

When storing your silver jewelry, it is best to use cloths or bags treated with a tarnish preventative. This keeps the jewelry from rubbing against other pieces, which will avoid scratching it. It is best to store your silver in a cool, dry place. It is best preserved away from any light - sunlight, or artificial light.

Product Warranty

Cloebelle allows returns on defective product that is returned within six months from date of sale. General wear and tear is not covered by the Cloebelle warranty. This includes damage from using liquid silver polish on the product, wearing it in pools, hot-tubs and spas, normal fading on oxidizing items and exposure to other harsh chemicals or environments.

Stretching of Cloebelle chains and bracelets is not considered a manufacturing defect.
